✷ SHELL DEPLOYMENT STRATEGY

Each shell uses:

- Variant of real name (no fictitious identities)
- Dedicated SimpleLogin alias
- Role-specific resume, rewritten for async deliverables
- Unique tone card (Appendix A2)
- Compartmented calendars, inboxes, and Slack containers

No employment history is fabricated.

No personal stories are used.

This system is **not deception — it's professional compartmentalization.**

_____

🧬 PLATFORM FILTERS (EXCERPT)

✅ "Async-first" → **Proceed**

❌ "Zoom culture / live sync" → **Kill listing**

✅ "Flexible hours / async ops" → **Deploy**

Shell Exited: 1 (Controlled burn after Slack tone collision)

_____

🚫 WHAT GHOST MODE IS *NOT*:

- Not identity fraud
- Not job juggling
- Not resume cosplay
- Not personality cloning
- Not hustle theater

✅ Ghost Mode is a **signal containment system**.

It enables async operators to execute multiple high-trust roles

through professional separation — not deception.
